Candlelight Park: How shall we develop it?

Please consider answering the following questions and submitting your answers to the Eugene Parks and Open Space Planning office. Responses will aid park planners in gauging how to best create a new master plan for the park. A schematic design will be brought back to a later public meeting for review and comment.

1. Keeping in mind that Candlelight is intended to be a neighborhood park, what are the types of activities you would like to participate in at the park? Features that are normally appropriate in neighborhood parks are:

- | | |
|-------------------------------------|-------------------------------------|
| * playgrounds | * restrooms and storage areas |
| * sports fields without lighting | * hard surface court areas |
| * picnic areas, (covered?) | * open lawn areas for informal play |
| * benches, drinking fountains, etc. | * trails and paths |

Other features not mentioned that you would like to see?

2. Please list your top three (3) activities you feel it is important for this park site to have.

3. Should the park have lighting to promote safety for children and adults?

4. Given the flat open nature of the park, how would you like see the park's landscaping developed? Elevation changes? Rolling turf? Hard surface areas for gatherings? Soft trails for walking/jogging? Some trees, or lots of trees?

5. How will you reach the park? Walk? Bicycle? Auto? Are there any improvements you can think of that would improve access to the park site?

6. The open drainage way through the park will most likely remain, however an opportunity exists to enhance it by changing its meander and laying back some of the banks and planting native vegetation. How do you feel about this?

Please hand in to staff at the meeting or mail to:
